Oleoresins and essential oils for the Veterinary and Animal Feed Industry

Discover our broad product range

Henry Lamotte Oils GmbH is a leading supplier and producer of oils, waxes and seed flours, as well as of colourings and flavourings.

Oleoresins and essential oils for the veterinary and animal feed industry

Colourings and flavourings are becoming increasingly important in the animal feed sector, as the organoleptic and optic properties of a foodstuff can be enriched with the help of these additives. For example, enhanced palatability can have a positive effect on the acceptance of animal feed. In addition, colourings such as oleoresins can influence the colour of ornamental fishes.

Henry Lamotte Oils – partners to the...

- veterinary and animal feed industry
- chemicals industry
